

INSIGHTS REPORT

- **Data Description:** The dataset contains detailed transactional and customer-level data from a global retail operation, specifically focused on Walmart's sales performance across multiple countries and product categories.
- **Key Components of the Dataset:**
 - **Orders:** Each record represents an order placed by a customer, including quantity, revenue, and associated profit.
 - **Geography:**
 - Country and State fields identify the market region.
 - The dataset covers six countries: United States, United Kingdom, France, Germany, Canada, and Australia.
 - **Product Information:**
 - Includes product categories (e.g., Bikes, Accessories, Clothing) and specific product names.
 - Profit and revenue metrics are linked to each product.
 - **Time Dimension:** Order dates are broken down by month, allowing for trend analysis across the calendar year.
 - **Customer Demographics:** Gender and age group (Youth, Young Adults, Adults, Seniors) are included for segmentation.
 - **Performance Metrics:**
 - **Key indicators include:**
 - Total Orders
 - Revenue
 - Profit
 - Cost
- **Purpose of the Dataset:**

The dataset is designed to enable performance analysis of Walmart's global operations — helping uncover trends in sales, profitability, customer behavior, and regional performance.

It supports decision-making in areas such as:

- Market prioritization
 - Product line optimization
 - Seasonal sales strategies
 - Customer targeting
-

INSIGHTS

- **Executive Summary (Key Figures):**

- Total Orders: \$1 million
- Total Revenue: \$85.3 million
- Total Profit: \$32.2 million
- Total Cost: \$53 million
- Strong Profit Margin: ~37.7% profit margin across all sales, showing operational efficiency.
- High Demand for Bikes: Bikes alone contributed over \$60M in revenue.
- Consistent Year-End Growth: Sales and profit both peaked in Q4, highlighting successful seasonal strategies.

- **Country-Wise Performance:**

- United States leads in both total orders and profit - the most profitable and high-volume region.
- France and United Kingdom follow closely behind in revenue contributions.
- Canada and Australia show moderate performance - potential for localized growth.

- **Monthly Sales & Profit Trends:**

- Highest sales months: June-August and October-December, likely tied to summer and holiday seasons.
- Lowest sales month: February-may benefit from targeted campaigns.
- Profit follows revenue trends, indicating strong cost control throughout the year.

- **Product Category Performance:**

- Bikes: Most profitable category, generating the highest revenue (> \$60M).
- Accessories and Clothing: Significantly lower revenue — potential upsell opportunity with bike purchases.
- Recommendation: Promote accessory bundles with bike sales to boost underperforming categories.

- **Top Products by Profit:**

- Mountain-200 (Black & Silver) and Road-150 (Red) consistently top the list.
- Sport-100 Helmet is sold frequently but generates lower profit - ideal for bundle pricing.

- **Customer Demographics:**

- Gender split: 52% Male, 48% Female - relatively balanced.
- Age group dominance:
 - Adults (35–64) are the largest buying segment.
 - Young Adults (25–34) are second-largest — tech-savvy and ad-responsive.
 - Youth (<25) and Seniors (64+) are smaller segments but present untapped potential.

- **Strategic Recommendations:**

- Focus on bike-related promotions, leveraging the most profitable category and top products.
- Double down on high-performing regions like the U.S., U.K., and France; explore tailored campaigns in underperforming countries.
- Launch off-season marketing (e.g. Feb–March) to balance demand year-round.
- Create product bundles (e.g., bikes + helmets + accessories) to raise average order value.
- Explore marketing for youth and senior segments, where current engagement is low but growth potential exists.
